## Perioperative Nursing Care Program

19444

ElarabyHospital  
elarabyhospital.com

## Training Proposal

### Introduction:

- According to ElAraby hospital vision to become the leading hospital in applying patient safety according to recent 7th edition JCI standards to start critical care nursing training program based on evidence based practice (EBP).
- The training program will be unique in mixing between lectures and practical training to gain the know-how in delivering professional, evidence-based nursing care.

### Scope of the program:

- To be the center of excellence for nursing training to ensure critical patient safety.
- Help nursing staff in hospitals to administer professional critical care nursing based on EBP.

### Benefits of the program:

- Establishing an efficient approach to patient safety and patient-centered care.
- Observe the best practices in the provision of healthcare services and become familiar with implementing the nursing procedures through well-planned practical training and live interaction with hospital staff.
- Participation in workshops and gain satisfactory knowledge regarding critical care nursing course.
